(54) Title: <u>EARLY DETECTION OF LYSOSOMAL STORAGE DISORDERS</u>		
(57) Abstract The present invention relates generally to lysosomal storage disorders and to diagnostic agents for their detection in humans and other animals. More particularly, the present invention is directed to the uses of the LSD markers Lamp-1, Lamp-2, Limp-II, 4-sulphatase, acid phosphatase (ACP), β -hexosaminidase or α -mannosidase, amongst others as diagnostic agents for the detection of many lysosomal storage disorders.
